To whom it may concern,

Alan Colquhoun has worked for 18 months as an intern in the IT Partner Management delivery team.

While he was new to the large corporate culture, Alan immediately fit into our delivery team and made connections with the team members. Alan's role was split between testing, UI mockup building and later Test Automation via a new tool called Worksoft.

After a ramp-up period of a few months, I could observe Alan taking accountability and ownership of the work, being engaged and involved in Scrum practices and actively driving to improve our team Scrum maturity level.

Alan also got engaged in the annual company-wide intrapreneurship initiatives that taught him design thinking, enabled him to network and taught him to work with others.

I was very pleased with Alan's progress in our team.

Sincerely,

A handwritten signature in black ink that reads 'Cirjoi'.

December 05, 2017

To whom it may concern, I collaborated with Alan Colquhoun over the past 18 months as he worked as an intern in the IT Partner Management delivery team.

Alan rapidly integrated to our various project teams, connecting well with the colleagues and making active contributions. Through training and guidance on new technologies and methodologies, Alan demonstrated motivation to learn and develop, diligence in approaching and addressing the tasks, accountability and ownership of tasks, and was a respectful and engaged team member. Alan contributed to the development of UI mockups as well as developing Test Automation scripts which was a new initiative for the team.

Alan also got engaged in company initiatives and multiple trainings with topics ranging from Agile and Scrum methodology, entrepreneurship, JAVA and cloud development, and more. Through these activities, I was pleased to see his further development including networking with external team members and presentation skills.

Sincerely,

A handwritten signature in black ink, appearing to read 'Brenden Kennedy'.
